

Multi-Bioactive Mela-Prep Lotion

Description

Multi-Bioactive Mela-Prep Lotion is a luxurious lotion containing an expertly formulated combination of highly specialized ingredients that assist in improving the appearance of uneven skin tone and visible sun damage, leaving the skin looking brighter and more evenly toned.

How to Use

- Pre-cleanse, cleanse and tone with your preferred Environ products.
- First apply Mela-Prep Lotion to darkened areas of the skin, morning and evening.
- Then mix equal amounts of Serum A and Serum B in the palm of the hand, gently massage into the pigmented areas of the skin morning and evening.
- Cosmetic needling prior to the application of the Mela-Prep Lotion and Mela-Fade Serum System is recommended for advanced Environ users in the evening.
- Finally apply Intense C-Boost to the full face (if the damage is extensive) / darkened areas (if the damage is localized) of the skin, morning and evening before moisturizing with your recommended Environ vitamin A moisturiser and a broad-spectrum sunscreen.

Benefits

- luxurious lotion of highly specialized ingredients
- use on small, defined dark spots or whole face/neck
- use in conjunction with high levels of vitamins A & C
- Sepi-White and niacinamide help to even the appearance of uneven skin tone
- helps to the clarify look of photo induced aging
- skin looks more radiantly healthy
